

Solar Energy

Chapter 9, Pages 499-579 of

Energy

Sources, Utilization, Legislation,
Sustainability, Illinois as Model State

World Scientific and Imperial College Pub, Co's, 2016.

LIST OF CONTENTS OF CHAPTER 9 - SOLAR ENERGY

9.1. Introduction

9.2. Concepts of solar power generation

9.2.1. Solar photothermal (PT)

9.2.2. Solar photovoltaic (PV) cells

9.2.2.1. *Thin film PV technology*

9.2.2.2. *New generation photovoltaics technologies*

9.3. Solar photothermal (PT) energy utilization technologies

9.3.1. Air-based solar heating systems

9.3.2. Liquid-based solar heating systems

- 9.3.2.1. *Direct or open loop solar liquid-based heating systems*
 - 9.3.2.2. *Indirect or closed loop solar heating systems*
 - 9.3.3. Examples of solar heating system installations
 - 9.3.4. Potential applications of solar photothermal (PT) cooling systems
 - 9.3.4.1. *Cooling through evaporation (Desiccant cooling)*
 - 9.3.4.2. *Solar absorption cooling*
 - 9.3.4.3. *Other potential applications of solar photothermal (PT) energy*
- 9.4. Solar photovoltaic (PV) energy utilization
 - 9.4.1. Solar PV configurations and types
 - 9.4.2. Standalone solar PV systems
 - 9.4.2.1. *Exelon Pavilions PV project*
 - 9.4.2.2. *DePaul University PV project*
 - 9.4.2.3. *Village of Oak Park PV project*
 - 9.4.2.4. *Shedd Aquarium PV project*
 - 9.4.2.5. *SSA office building PV project*
 - 9.4.2.6. *Village of Downers Grove PV project*
 - 9.4.3. Utility-scale photovoltaic (PV) projects
 - 9.4.3.1. *West Pullman PV plant*
 - 9.4.3.2. *Grand Ridge solar park PV plant*
 - 9.4.3.3. *Rockford PV solar plant*
- 9.5. Passive solar energy technology utilization
 - 9.5.1. Types of passive solar energy technologies
 - 9.5.1.1. *Direct gain design of passive solar systems*
 - 9.5.1.2. *Indirect gain design of passive solar systems*
 - 9.5.1.3. *Isolated gain design of passive solar systems*
 - 9.5.1.4. *Passive solar cooling*
 - 9.5.2. Construction of passive solar houses
 - 9.5.2.1. *Lo-Cal House*
 - 9.5.2.2. *Smith's Passivhaus*
 - 9.5.2.3. *Carbondale passive house*
- 9.6. Problems associated with the solar energy utilization
- 9.7. Sustainability of solar energy
 - 9.7.1. Economics of solar power conversion
 - 9.7.2. Land and water use in solar power technology
 - 9.7.3. Environmental issues of solar cell manufacturing
- 9.8. Concluding remarks
- 9.9. Bibliography
